PROFESSIONAL SUMMARY

BS Information Technology graduate, Major in Software Engineering, with professional programming experience and hands-on technical support. Built and tested AI/workflow automation projects using **n8n, Make, OpenAI, APIs, webhooks, JSON, Google Sheets, Gmail, and Docker**. Comfortable translating process requirements into practical workflows, troubleshooting integrations, reviewing AI output, and documenting technical work. Currently strengthening multi-platform automation skills through n8n and Make Academy training.

CORE TECHNICAL SKILLS

Automation & AI: n8n, Make, OpenAI, AI agent fundamentals, prompt design, Webhooks, REST APIs, JSON, Google Sheets, Gmail
Development: JavaScript, C#, Java, PHP, HTML5, CSS3, React.js, React Native
Data & Tools: MySQL, Microsoft SQL Server, Firebase, Firestore, Git, GitHub, VS Code, Docker
IT Support: Windows setup/maintenance, hardware/software troubleshooting, drivers, printers, RJ45/Ethernet, basic LAN and connectivity
Credentials: n8n Foundations Professional track - 4 course certificates; Make Foundation badge; AI Automation Explorer badge

AI AUTOMATION PROJECTS

AI Client Inquiry & Lead Qualification Automation | n8n | OpenAI | Webhooks | Google Sheets | Gmail

- Portfolio/training project that validates and deduplicates inquiries, extracts structured details with AI, applies rule-based scoring, and routes Hot/Warm/Cold follow-ups.
- Designed the workflow logic, mappings, prompts, testing, error handling, and output review; AI was used for extraction and draft generation rather than business-rule decisions.

AI Recruitment & Candidate Pipeline Automation | n8n | OpenAI | Gmail | Google Sheets

- Built and tested connected workflows for candidate intake, duplicate prevention, recruiter actions, message drafting, scheduled follow-ups, and centralized error handling.
- Kept important recruiter decisions human-controlled while using AI to assist with interpretation and drafting.

Inventory & Low-Stock Business Automation | n8n | Google Sheets | Gmail

- Built and tested a scheduled workflow that checks stock against reorder thresholds, consolidates low-stock items, and sends readable alerts and summaries.
- Handled edge cases such as zero low-stock items to avoid unnecessary or misleading notifications.

PROFESSIONAL EXPERIENCE

Quadrant Information Services, Inc.

2020 - 2023

Rate Programmer

Developed and maintained system components, worked with database/application logic, troubleshoot issues, and documented technical work within existing systems.

Freelance Technical & Development Work

2023 - Present

Independent Developer / Technical Support

Built and supported small software/web projects and handled implementation, debugging, revisions, Windows/software setup, and hardware troubleshooting for local clients.

STKR Maniac Printing Services

2023 - Present

Business Owner / Technical Operations

Manage client production work and maintain/troubleshoot computers, printers, software, and related equipment used in daily operations.

SELECTED SOFTWARE PROJECTS

Kopi Brews Operations App | React Native | Firebase | Firestore - Private multi-user Android prototype for orders, inventory, sales insights, loyalty, rewards, and customer history.

Eleventh28 POS + Kitchen Display | C# WinForms | MySQL | Crystal Reports - Team capstone covering role-based access, POS/payment, kitchen workflow, inventory, reports, logs, and database utilities.

EDUCATION

BS Information Technology, Major in Software Engineering - STI College Global City, 2015 - 2019
