

MARK JHOLLAN NEBRIDA BRICIA

Junior AI Automation Specialist | Workflow Automation | IT Support

Taguig City, Philippines | makmakbricia@gmail.com

Portfolio: mbriciaportfolio.vercel.app | GitHub: github.com/mbricia | LinkedIn: linkedin.com/in/mark-jhollan-bricia-a783a1182

PROFESSIONAL SUMMARY

BS Information Technology graduate specializing in Software Engineering with hands-on experience in software development, workflow automation, and technical support. Built and tested automation workflows using n8n, Make, APIs, webhooks, OpenAI, Google Sheets, Gmail, and JavaScript. Experienced in self-hosting n8n with Docker, troubleshooting integrations, handling API authentication and errors, and migrating workflows from cloud to local environments. Also experienced in web and mobile development, database systems, PC troubleshooting, and basic networking.

CORE TECHNICAL SKILLS

Automation & AI: n8n, Make, Workflow Automation, OpenAI, APIs, Webhooks, HTTP Request, JSON, Authentication, Error Handling, Google Sheets, Gmail

Programming & Web Development: JavaScript, HTML, CSS, React, React Native, C#, Java, PHP

Database & Tools: MySQL, Firebase, Firestore, Docker, Git, GitHub

IT Support: PC Hardware and Software Troubleshooting, Windows Support, Software and Driver Installation, Printer Setup, Basic Networking, RJ45/Ethernet, LAN Connectivity, Technical Documentation

PROFESSIONAL EXPERIENCE

Quadrant Information Services, Inc. | 2020-2023

Rate Programmer

- Developed and maintained software components based on project requirements using database and application logic.
- Performed structured troubleshooting, testing, and problem-solving during development and maintenance tasks.
- Documented technical work and supported software updates and issue resolution.

Freelance Technical & Development Work | 2023-Present

Independent Developer / Technical Support

- Build and support small software, web, and technical projects for students and local clients.
- Handle implementation, debugging, troubleshooting, revisions, and technical problem-solving.
- Provide Windows, software, driver, hardware, and PC troubleshooting support.
- Assist with website development, system setup, and general technical support requirements.

STKR Manila Printing Services | 2023-Present

Business Owner / Technical Operations

- Manage customer orders and prepare production-ready files from design through final output.
- Maintain computers, printers, software, and related production equipment used in daily operations.
- Troubleshoot hardware, software, connectivity, and printing issues to minimize operational downtime.

SELECTED AUTOMATION PROJECTS

AI Client Inquiry & Lead Qualification Automation

n8n | OpenAI | JavaScript | Webhooks | Google Sheets | Gmail

- Built an end-to-end workflow that validates incoming inquiries and prevents duplicate records.
- Uses AI to extract structured project information and draft personalized responses.
- Applies deterministic 0-100 lead scoring and routes Hot, Warm, and Cold leads to appropriate actions.
- Tested valid, invalid, duplicate, routing, workflow failure, and client-response scenarios.

Inventory & Low-Stock Business Automation

n8n | Google Sheets | Gmail | JavaScript

- Built a scheduled workflow that monitors inventory against per-item reorder thresholds.
- Consolidates low-stock products into a single reorder list and sends automated email alerts.
- Produces daily inventory summaries and handles zero-low-stock conditions without unnecessary alerts.
- Tested both low-stock and healthy inventory scenarios.

AI Recruitment & Candidate Pipeline Automation

n8n | OpenAI | Gmail | Google Sheets

- Built a four-workflow recruitment system for candidate intake, recruiter actions, reminders, and technical error handling.
- Implements candidate and application duplicate checks with controlled stage transitions.
- Uses AI for email interpretation and candidate communication drafts while keeping recruiter decisions human-controlled.
- Includes due and overdue follow-up reminders, audit logging, and centralized error capture.

Self-Hosted n8n Environment

Docker | n8n | APIs | OAuth

- Set up and maintained a self-hosted n8n environment using Docker with persistent storage.
- Migrated existing workflows from n8n Cloud to a local environment.
- Reconfigured Google Sheets and Gmail OAuth integrations and resolved authentication issues.
- Tested production webhooks, workflow executions, email delivery, data logging, backup, and restore procedures.

ADDITIONAL SOFTWARE PROJECTS

Kopi Brews Operations App

React Native | Firebase | Firestore

- Developed a private multi-user cafe operations prototype for administrator, cashier, and customer workflows.
- Includes ordering, inventory, sales visibility, customer history, loyalty, and reward features.

Eleventh28 POS + Kitchen Display System

C# | WinForms | MySQL | Crystal Reports

- Contributed to a team software engineering capstone for restaurant operations.
- Supported cashier transactions, kitchen order status, ingredient inventory, reporting, and role-based access.

TRAINING & CREDENTIALS

n8n Academy - 4 Certificates of Completion | 2026

- Training covered workflow automation, integrations, APIs, AI workflows, testing, and automation practices.

Make Academy - Automation to AI Agents: Foundation | 2026

- Completed the course and earned three academy badges; hands-on topics included webhooks, routers, filters, bundles, mapping, Google Sheets integration, and scenario debugging.

EDUCATION

Bachelor of Science in Information Technology - Major in Software Engineering

STI College Global City | 2015-2019
