PROFESSIONAL SUMMARY

BS Information Technology graduate majoring in Software Engineering with hands-on experience in workflow automation, software development, and technical support. Built and tested n8n automations using APIs, webhooks, OpenAI, Google Sheets, Gmail, JavaScript, and Docker. Experienced in self-hosted n8n, OAuth/API troubleshooting, web/mobile development, databases, PC support, and basic networking.

CORE TECHNICAL SKILLS

Automation & Integration: n8n, Make, OpenAI, APIs, Webhooks, HTTP Request, JSON, OAuth, Error Handling, Google Sheets, Gmail

Development: JavaScript, HTML, CSS, React, React Native, C#, Java, PHP (college/project foundations)

Database: SQL query fundamentals (CRUD, filtering, joins), MySQL (relational DBMS), Firebase, Firestore

Tools / Deployment: Docker, Git, GitHub, Vercel, Netlify

IT Support: Windows, PC Hardware/Software Troubleshooting, Drivers, Printers, Basic Networking, RJ45/Ethernet, LAN

PROFESSIONAL EXPERIENCE

Freelance Technical & Development Work

2023-Present

Independent Developer / Technical Support

- Build and support small software, web, automation, and technical projects, including implementation, debugging, revisions, and system setup.
- Provide Windows, software, driver, hardware, PC troubleshooting, and general technical support for local clients.
- Develop and test workflow automations using n8n, APIs, webhooks, Google Sheets, Gmail, and AI integrations.

STKR Manila Printing Services

2023-Present

Business Owner / Technical Operations

- Manage customer orders, production-ready files, computers, printers, software, and day-to-day technical operations.
- Troubleshoot hardware, software, connectivity, and printing issues to minimize operational downtime.

Quadrant Information Services, Inc.

2020-2023

Rate Programmer

- Developed and maintained software components using database and application logic based on project requirements.
- Performed troubleshooting, testing, issue resolution, and technical documentation during development and maintenance.

SELECTED AUTOMATION PROJECTS

AI Client Inquiry & Lead Qualification Automation | n8n | OpenAI | JavaScript | Webhooks | Google Sheets | Gmail

- Validates inquiries, prevents duplicates, extracts structured details with AI, applies 0-100 rule-based scoring, and routes Hot/Warm/Cold leads.
- Tested valid, invalid, duplicate, routing, workflow-failure, and client-response scenarios.

Inventory & Low-Stock Business Automation | n8n | Google Sheets | Gmail | JavaScript

- Monitors per-item reorder thresholds, consolidates low-stock items, and sends reorder alerts plus daily inventory summaries.
- Tested both low-stock and zero-low-stock inventory conditions.

AI Recruitment & Candidate Pipeline Automation | n8n | OpenAI | Gmail | Google Sheets

- Four-workflow recruitment system for candidate intake, deduplication, recruiter actions, reminders, email drafts, and error handling.
- Keeps recruiter decisions human-controlled while using AI for interpretation and draft generation.

ADDITIONAL PROJECTS & TRAINING

Self-Hosted n8n (Docker): Migrated cloud workflows to local n8n, reconfigured Google Sheets/Gmail OAuth, and verified webhooks, backups, and restore.

Eleventh28 POS + Kitchen Display: Team capstone built with C#/WinForms and MySQL, using SQL queries to read and manage application data.

Kopi Brews Operations App: React Native/Firebase operations app (private prototype).

Training: 4 n8n certificates; Make Academy - Automation to AI Agents: Foundation; 3 Make Academy badges (2026).

EDUCATION

Bachelor of Science in Information Technology, Major in Software Engineering | STI College Global City | 2015-2019
